

Environmental Policy

The Weldtronics Group provides products and services to the Mining and Resources, Oil and Gas, Marine and Power sectors and other related industries requiring expert advice and superior performance in the following specialised fields:

- Fabrication, Installation and Welding of all steel types and grades.
- Specialised Welding of all stainless steel, exotic and titanium materials.
- Repairs and maintenance to plant and equipment including fabrication, welding and machining.

In pursuit of our corporate vision, Weldtronics is committed to achieving responsible environmental management.

Through the development, training and empowerment of our people, Weldtronics will meet or exceed its legal and social obligations with regard to the environment.

Our Environmental Management System, where possible, is based on Best Practice Environmental Management.

Weldtronics will provide adequate funding and resources to ensure that our environmental objective is achieved along with continual improvement in “environmental performance.”

No system should suppress innovation. Weldtronics encourages feedback and constructive criticism from all parties at any time and as such, all Weldtronics employees are involved in our commitment to the environment.

Our performance and continuous improvement depends on everyone’s involvement.

Dave Osman
Managing Director
