

Occupational Health and Safety Policy

The Weldtronics Group provides products and services to the Mining, Power Generation, Oil/Gas, Marine and other related industries requiring expert advice and superior performance in the following specialised fields:

- Fabrication and Welding of all steel types and grades.
- Specialised Welding of all stainless steel, exotic and titanium materials.
- Repairs and maintenance to plant and equipment.
- Project and Technical Services.

In pursuit of our corporate vision, Weldtronics is committed to achieving the highest level of Safety Management, and conduct regular assessments on the Safety Management System to ensure compliance to the OH&S Act and Regulations.

Through development, training and communication to our people, Weldtronics strives to exceed its legal and business commitments with regard to effective Safety Management and is committed to zero harm.

Weldtronics provides adequate funding and resources to ensure that our safety goal of zero harm is achieved.

Weldtronics encourages feedback and constructive criticism from all parties at any time and as such, all Weldtronics employees are involved in our commitment to achieving the targets set. Weldtronics employees are expected to comply with all Occupational Health and Safety procedures and systems of the company and others as identified through inductions and training when hosted on client sites.

Our performance and continuous improvement depends on everyone's involvement. At risk behaviours are not tolerated and we must all settle for nothing less than - zero harm.

Dave Osman
Managing Director
